## Quick-Sit Chair Blind combines features hunters covet

Brainerd, MN, January 17, 2007 – A virtual wave of hunting ground blinds have recently filled the shelves of outdoor stores. Some models offer comfort, but sacrifice in set-up time and true portability. Others provide concealment, but very little peripheral visibility. Others still, build their features into ponderous price tags.

Meanwhile, tucked into that little backwoods hotspot, Nature Vision's new [Quick-Sit Chair Blind](#) is surprising hunters nearly as much as it does wild game. Available in both one and two-person models, the Quick-Sit Blind combines key hunting features—concealment, comfort, silence, and portability—all into a shelter that retails for under \$100. Both feature a low-profile “shorty” chair design, which yields maximum versatility and concealment, especially for pursuing species such as wild turkeys. The two-person version is perfect for hunting alongside youngsters.

Disguised with Nature Vision's exclusive Treeline® pattern and super-natural brush drapes, the Quick-Sit presents an indistinct, shadowy package that blends seamlessly into a variety of environments. The Blind's easy flip-over frame also allows for instant set-up. The chairs offer a super-comfortable, oversized seat and backrest, complete with armrests that sport small gear / ammo holders. Weighing just 15-pounds, the Quick-Sit folds up fast and stows neatly into a shoulder bag (included). These key features let hunters easily access and remain hidden in the most remote locations. Beyond the Quick-Sit Blind's obvious advantages, perhaps its best feature is versatility—the compact, flexible design caters to hunters toting rifles, shotguns, bows, or crossbows.

The Quick-Sit Chair Blind is the latest in a continuing series of advanced hunting products offered by Nature Vision. Look for the Quick-Sit, as well as Woodland Whisper® Hearing Enhancers, Digital Deer Scale, Digital Archery Scale, and Digital Turkey Scale at major sporting and outdoor outlets nationwide.

Nature Vision, Inc., a publicly held corporation headquartered in Brainerd, Minnesota, created Aqua-Vu, the first self-contained underwater viewing system in 1997. Founded by President/ CEO Jeff Zernov, Nature Vision, Inc. continues to reinvent the outdoor experience.
